

? Developer Setup & Onboarding Guide

NSTP Management System — Laravel 11 / 13 + Vite + Tailwind CSS

Repository: <https://github.com/zygradezeropat/nstp-laravel-mng-syst.git>
Subfolder: nstp-lara
Target Stack: PHP 8.2+, Composer 2.x, Node.js 18+, MySQL/MariaDB (XAMPP/phpMyAdmin)

1. ? System Prerequisites

Software	Required Version	Description / Purpose
Git	Latest	Version control to clone and push updates
PHP	^8.2 / 8.3+	Laravel backend runtime (ext: pdo, mbstring, openssl, gd, fileinfo)
Composer	2.x+	PHP Dependency package manager
Node.js & npm	v18+ / v20+	JavaScript runtime & asset bundler (Vite + Tailwind)
Database	MySQL / MariaDB	Local relational database via XAMPP, Herd, or DBngin

2. ?? Step-by-Step Installation Guide

Step 1: Clone Repository & Navigate to App Directory

```
git clone https://github.com/zygradezeropat/nstp-laravel-mng-syst.git
cd nstp-laravel-mng-syst/nstp-lara
```

Step 2: Install PHP Backend Dependencies

```
composer install
```

Step 3: Install Frontend NPM Packages

```
npm install
```

Step 4: Configure Environment File (.env)

Copy .env.example to .env and generate the app key:

```
copy .env.example .env
php artisan key:generate
```

Verify your .env database settings match your local MySQL configuration:

```
DB_CONNECTION=mysql
DB_HOST=127.0.0.1
DB_PORT=3306
DB_DATABASE=nstp_db
DB_USERNAME=root
DB_PASSWORD=
```

? **Database Setup:** Open phpMyAdmin (or your SQL tool) and create an empty database named `nstp_db` before running migrations.

Step 5: Run Database Migrations & Seed Default Data

```
php artisan migrate:fresh --seed
```

Step 6: Link Public Storage for Uploads

```
php artisan storage:link
```

3. ? Default Login Accounts

All seeded test accounts use the default password: **password**

Role	Email Address	Password	Access Scope
Administrator	admin123@dnsc.edu.ph	password	User Accounts, System Logs, Settings
Coordinator	coordinator@dnsc.edu.ph	password	Sections, OCR Engine, Reports, Templates
Instructor	instructor@dnsc.edu.ph	password	Section Rosters, Lesson Plans, Attendance
ROTC Officer	rotc@dnsc.edu.ph	password	Cadets, Platoons, Merits/Demerits, Designs

4. ? How to Run the App Locally

Option A: Single Command Concurrent Runner (Recommended)

```
npm run dev
```

Access the web application in browser at: <http://127.0.0.1:8000>

Option B: Two Separate Terminals

```
# Terminal 1 - Backend Server
php artisan serve

# Terminal 2 - Asset Bundler
```

```
npm run dev
```

5. ? Git Collaboration Workflow

```
# Always pull latest code before editing
git pull origin main

# Make changes, then stage and commit
git add .
git commit -m "feat: description of work done"

# Push to repository
git push origin main
```
